A: You will need to use regex to match using the anchors ^ and \$ to denote the start and end of the string. It will look something like this: "(?sm)^(?:[-])(?:[r]|^)[a-z]{2,5}(?:\s\$)" You can see this regex in action here: [The characters {2,5} are saying: Between 2 and 5 of them They could be any letter other than what is defined in a, so {a-z} will include things like e, f etc. The ^ and \\$ refer to start of string and end of string respectively.](#) A: You could also use this regex to find the letters: (?Q: How can I fetch all the posts from category and sub-categories through request.is_ajax() with django-tastypie and object-list? I am new to django.I am trying to fetch all the posts from category and sub-categories through request.is_ajax() with django-tastypie and object-list.Here is my view.py I am not getting any error but it is not fetching all the posts from category. from django.http import HttpResponseRedirect from tastypie.resources import ModelResource from django.contrib.auth.models import User from category.models import Category from posts.models import Post class CategoryResource(ModelResource): class Meta: queryset = Category.objects.all() resource_name = "category" authorization =
